- **Retrofits/Rebuilds** - Every company has one – the trusted machine tool that has been a staple workhorse in the plant, for years. It works competently enough and gets the job done, but with newer and faster machines on the market today; you wonder if you could achieve better performance and results with something else. When the investment for a new machine is not in the budget, consider a retrofit or rebuild of existing machine tools.
 - A viable alternative to purchasing costly new machines
 - Newland technicians will update your equipment by improving the mechanical and electrical performance in your current medium to large-sized machine tools:
 - Improve the accuracy and overall performance
 - Maximize your automatic machining time
 - Ensure continuous machining without hesitation
 - Improve the reliability of your control system
 - Reduce cycle times of existing jobs
 - Increase your speeds and feeds
 - Allow for easier programming with increased features
 - Reduce maintenance time
 - **Call for Quotation**

Notes:

1. Laser calibration does not include leveling and geometry adjustment.
 2. Price for parts and services not described above will require written approval from the customer prior to work performed.
 3. Payment Terms: Net 30 days after invoice
 4. Newland Machine Tool Group, Inc. is not responsible for defective or incorrect parts shipped from a third party supplier, or loss of production due to machinery down time or part delivery.
